

MODEL MK5

TECHNICAL SPECIFICATIONS

Press-fit precision metal bellows couplings

Properties:

- electrically insulated
- no wear
- easy mounting and dismantling
- absolutely backlash-free and torsionally rigid
- low moment of inertia
- compensates for 3-axis of misalignment

Material:

Bellows made of highly flexible high-grade stainless steel, the clamping hubs and tapered female segment on the bellows face are aluminium. Tapered segment on the hub face: glass-fiber reinforced plastic deposited onto an aluminium hub.

Design:

With a single radial clamping screw per hub ISO 4762. Backlash-free, blind mate press-fit connection

Temperature range:

-30° to +110° C (3,6 F to 230 F)

Speed:

Up to 10,000 rpm, over 10,000 rpm available with balanced version.

Service life:

These couplings have an infinite life and are maintenance-free if the technical ratings are not exceeded.

Fit tolerance:

On the hub/shaft connection 0.01 to 0.05 mm.

Non-standard applications:

Custom designs with varied tolerances, keyways, non-standard material and bellows are available upon request.
